NalamPath

Predictable care. Any phone. Every patient.

An inclusive digital healthcare platform designed for Tamil Nadu that works seamlessly with smartphones, feature phones, and even without internet connectivity.

Problem Statement

Endless Waiting

Long queues and delayed appointments frustrate patients and staff, leading to wasted time and poor experiences.

Daily Overcrowding

Hospitals and clinics are often overwhelmed by high patient volumes, compromising care quality and staff well-being.

Digital Divide

Millions are excluded from modern healthcare solutions due to limited smartphone ownership or lack of internet access.

Paper Records Crisis

Manual record-keeping is inefficient, prone to errors, and makes data retrieval and sharing incredibly difficult.

Prohibitive Costs

High administrative and treatment expenses make quality healthcare financially out of reach for a vast segment of the population.

These systemic issues lead to patient frustration, inefficient operations, and exclusion for millions, ultimately compromising care quality and safety while burdening smaller clinics with insurmountable financial barriers.

OUR SOLUTION

NalamPath Fixes This

A software-only healthcare coordination platform designed for 100% patient inclusivity across Tamil Nadu's diverse population.

Predictable Visit Times

Intelligent scheduling that respects everyone's time

Zero Overcrowding

Smooth patient flow throughout the day

Universal Access

Works via App, SMS, and Point-of-Service terminals

Complete Inclusion

Every patient counts, regardless of their device

GLOBAL IMPACT & SDG ALIGNMENT

Driving Inclusive Healthcare at Scale

Our platform is purpose-built to create measurable social impact, directly aligned with the United Nations Sustainable Development Goals.

SDG 3

Good Health & Well-Being

- Improving access to timely care
- Reduces patient waiting time and overcrowding
- Ensures predictable consultations for every patient
- Improves clinic efficiency and quality of care

SDG 9

Industry, Innovation & Infrastructure

- Digital infrastructure for real-world clinics
- Software-only solution (no hardware dependency)
- Works on smartphones, feature phones & low bandwidth
- Easily deployable in small and medium clinics

SDG 10

Reduced Inequalities

- Healthcare that doesn't discriminate by device or internet
- Accessible to rural, elderly, and digitally excluded populations
- Equal experience regardless of phone type or location
- Bridges the urban–rural healthcare technology gap

Impact Promise: Same care. Same clarity. Any phone. Any patient.

Two-Stage Smart Queueing

Our core innovation eliminates waiting while maintaining workflow efficiency for healthcare providers.

Enroute Queue

Patients book appointments via App or SMS. Their slot is reserved before they leave home—no waiting room time wasted.

Active Queue

Patients enter the active queue only after clinic check-in. Late arrivals are automatically adjusted, not cancelled, ensuring flexibility.

For Patients

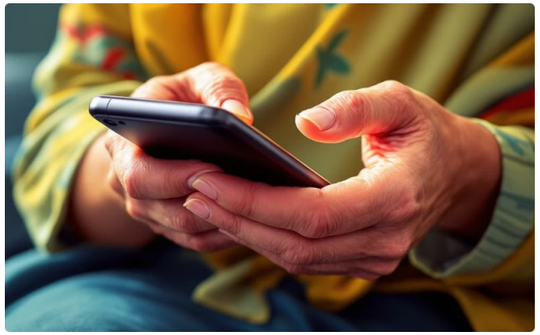
Predictable visit times mean you can plan your day without anxiety about long waits or uncertain schedules.

For Doctors

Smooth, consistent workflow throughout the day with no sudden rushes or idle periods disrupting quality care delivery.

Zero Digital Exclusion

One Platform. Every Phone. All Patients.



SMS Booking

Simple text message interface works on any phone without internet. Book appointments, receive confirmations, and get visit reminders—all via SMS.

Point-of-Service Walk-ins

Dedicated terminals at clinics serve elderly patients and non-tech users. Staff assistance ensures no one is left behind in the digital transition.

QR Visit Slip

Every visit generates a QR-enabled slip that links to complete digital health records. Bridge paper and digital worlds seamlessly.

True inclusivity: Whether you have a smartphone, a basic Nokia, or prefer in-person help—**NalamPath** works for you.

VALUE PROPOSITION

Why Clinics Will Adopt NalamPath

We Removed Hardware, Not Features

Zero Infrastructure Burden

- No hardware or servers required
- Cloud-based SaaS model
- No IT staff needed
- Pay-as-you-grow pricing
- Built on open-source foundation

Measurable Impact

40%

Reduction

Administrative work decreased, freeing staff for patient care

₹300–₹500

Per Visit

Cost savings from reduced redundancy and improved efficiency

Enterprise-Grade Security

Lifetime digital health records with OTP-based patient consent, DPDP Act compliance, and AES-256 encryption protecting sensitive data.

Scalable Growth Path

Start with pilot clinics, expand district-wide, then scale across Tamil Nadu—proven technology ready for rapid deployment.

> "Affordable digital transformation that actually works for small clinics serving rural Tamil Nadu communities."
